Professional Summary

Dynamic Frontend Developer, Product Manager, and Team Lead with experience building scalable web applications and managing collaborative software projects. Skilled in React.js, JavaScript, TypeScript, responsive UI engineering, and AI-assisted development workflows. Experienced in product planning, architecture discussions, team coordination, and translating business requirements into technical solutions.

Technical Skills

- Frontend: JavaScript, TypeScript, React.js, HTML5, CSS3
- Styling: Tailwind CSS, Bootstrap, Responsive Design
- AI: ChatGPT, Claude, Gemini, DeepSeek, Replit Agent, Prompt Engineering
- Backend: Node.js, Express.js, MongoDB (In Progress)
- Tools: Git, GitHub, Figma, WordPress (Elementor)

Experience

Founder, Product Manager & Team Lead | Zodex Studio

May 2026 - Present

Founded and lead a software development studio, managing product strategy, sprint planning, task delegation, and cross-functional collaboration. Coordinate technical decisions and align product objectives with scalable engineering practices.

Product Manager & Frontend Developer | DevCore Team

April 2026 - Present

Lead frontend and product workflows, refactor legacy interfaces, build scalable JavaScript solutions, and prepare applications for React.js and backend API integration while improving development standards.
